

codebay

*We deliver agile software
development teams as a service.*

PORTFOLIO

LEGAL SERVICES

Avalco is a cloud system which allows you to create, organize, link and modify legal documents, its file automation software allows you to create personalized legal documents without problems following essential standards channeled by specialists.

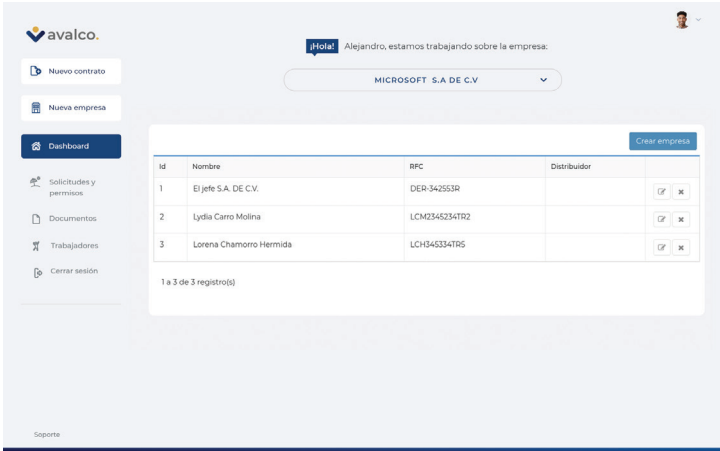

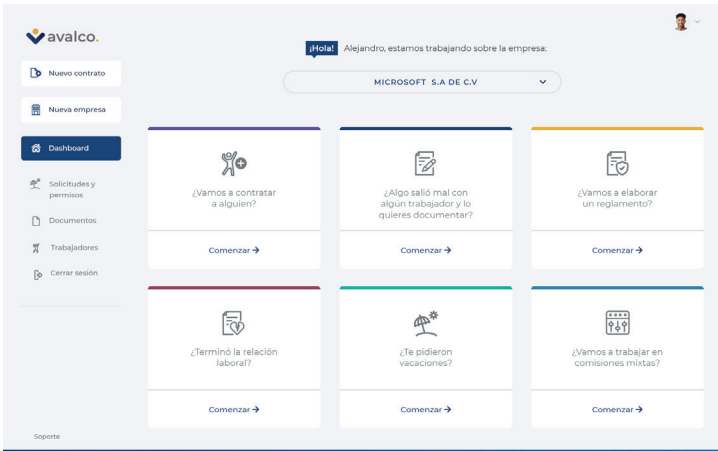

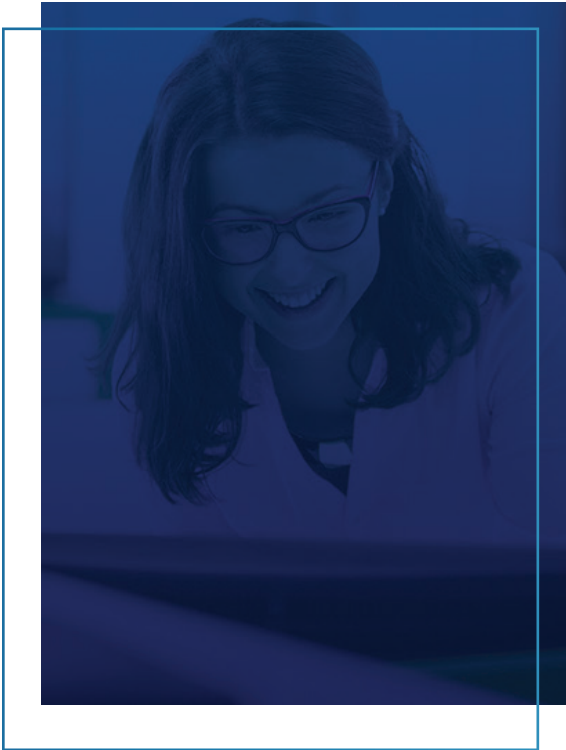

ISSUE:

The vision of the system emerged a few years ago; However, the lack of a company specialized in software development which would comply with strict privacy controls in the management of processes and sensitive documentation impeded the start of the project.

SOLUTION:

Codebay not only provided security and the essential protocols for managing sensitive documentation necessary for the project; we integrate a process engineer to support the company with the system architecture.

We develop the platform practically from scratch. Currently it is a functional and fully operational system, our engineers provide support and maintenance to the system and servers.

YEAR	2019
TECHNOLOGIES	PHP, Vue.js, AWS

MANIFEST OF AGILE DEVELOPMENT

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

Individuals and interactions over processes and tools.

Working software over comprehensive documentation.

Customer collaboration over contract negotiation.

Responding to change over following a plan.

That is, while there is value in the items on the right, we value the items on the left more.
