*We deliver agile software  
development teams as a service.*

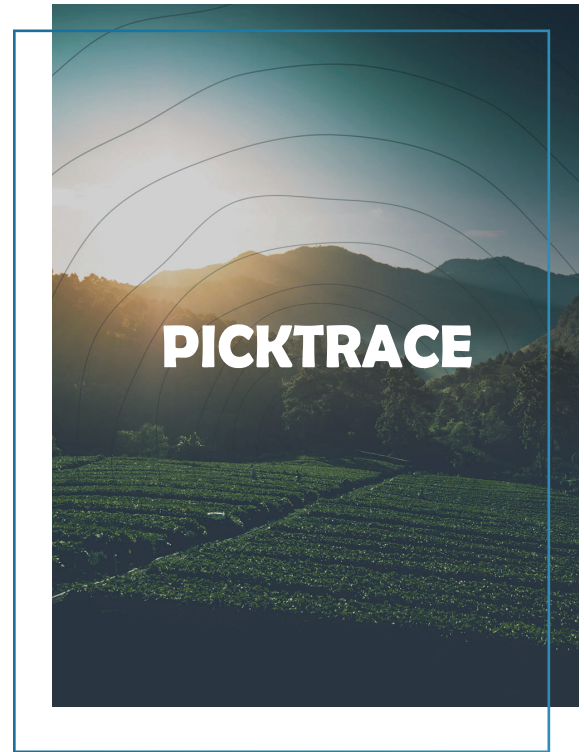

**PORTFOLIO**

FARMING

PickTrace is a fast-growing software company that provides workforce and harvest management solutions for large-scale farms. PickTrace is building the farm management system of the future.

PickTrace's powerful technology helps agricultural producers thrive in a time when regulatory, labor market, trade, and environmental pressures are increasingly challenging.

**ISSUE:**

The company's web image was outdated and obsolete; as well as with critical errors in the development of the web portal.

**SOLUTION:**

With the support of the administrative and graphic area of the company, our firm managed to create an adequate structure for its web portal which complies with essential standards for its proper functioning.

The current portal not only has an excellent interface; but also, it has an optimal and structured code development, in addition a system for content management was implemented.

# MANIFEST OF AGILE DEVELOPMENT

---

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

**Individuals and interactions** over processes and tools.

**Working software** over comprehensive documentation.

**Customer collaboration** over contract negotiation.

**Responding to change** over following a plan.

That is, while there is value in the items on the right, we value the items on the left more.
